INTEGRATIONS SPECIALIST - MJ FREEWAY

Sept 2017 - Dec 2017

HTML5 - CSS3 - cURL - Postman - Agile/Scrum

Jira/Kanban - salesforce - API's

I was the single point of contact for all Web and Software developers who are integrating with the state of Washington's traceability software. My role was to receive incoming technical questions and asses whether a 3rd Party Developer had found a legitimate bug in our code, or if they needed my help developing against our API (Leaf Data Systems).

Other Responsibilities: Documented all endpoints for the API, wrote the software test all 3rd party developers have to complete to receive a production API key, created tutorials for Software Engineers, wrote and screened Jira tickets, documented errors with each new code release for daily standup meetings.
